

**Mathematics Workshop on Nonlinear Analysis,
Differential Equations, Dynamical Systems, and
Applications**

*Dedicated to Professor Alan C. Lazer's 70th birthday—a great
mathematicians and a great teacher*

Date: *June, 28, 2008 10:00 AM—5:00 PM*

Place: *BV 1.312*

Speakers: There will be four lectures by internationally renowned mathematicians with expertise in the following subjects:

1. Professor **Djairo De Figueiredo**, UNICAMP, Brazil, specializes in the general area of Nonlinear Analysis and Differential Equations, mostly Partial Differential Equations. He will lecture **10:00–11:00 AM**.

1. Professor **Kenneth Palmer**, University of Taiwan, specializes in the area of dynamical Systems and Differential Equations. He will lecture **11:00–12 PM**

Lunch: 12:00–3PM

Professor **Fabio Zanolin**, University of Udine, Italy, specializes in the general area of ODE, Dynamical Systems, and Population Dynamics. He will lecture 3:00–4:00 PM.

Professor **Marcellino Gaudenzi**, University of Udine, Italy, specializes in ODE and applications to Economics. He will lecture 4:00–5:00 PM.

Remark: The general format of the conference will be more like a workshop, in the sense that there will be ample opportunity for both formal and informal discussions. In addition, the guest speakers will be available to discuss research related to their areas of expertise on Sunday. Interested participants, **specially graduate students**, are encouraged to make appointments with the speakers.
